WORKING EXPERIENCE

Dreamshub Limited, Hong Kong

Analyst Programmer, Jul 2017 – Dec 2020

- Program design and development
- System maintenance, testing and bug-fixing
- Communication with clients for requirements

Selected projects include...

CMS

- An internal admin website for colleagues to upload homepage banners and draft events. It is written in .NET Core with IIS as server and MySQL as DB. We use adminLTE as template layout and Bootstrap for general design and styling.

CRM (Customer Relationship Management)

- An internal website for the accounting department to manage customers' information, written in C# ASP.NET using MS SQL Server as data storage. Provide functions to present the customer data, export report to pdf or excel, and calculate monthly summary.

Cash Sites

- It is a series of gaming websites, mainly make use of C# with ASP.NET, combining node.js framework and MS SQL Server as backend. We implement a member center for

continued...

displaying member information, deposit and withdraw function for money transfer and game import, such as live game, e-game, and fish game.

Armitage Technologies Limited, Hong Kong

Senior Programmer, Jun 2012 – Apr 2017

Selected projects include...

SLM4 (Share & Loan Management System version 4)

- It is a share and loan management application using C# and Windows Forms, output crystal report and connect to MS SQL Server. It builds for a local organization that serves more than 50,000 members. As a lead developer who is involved in the whole SDLC process, mainly in charge of functions and reports implementation and testing. Provide maintenance support when receiving incident calls from the client. Compose technical documentation such as user guide and functional requirement specification.

FFS (Fine Food System)

- A project to design and reconstruct an ordering website built for a local 5-star hotel. It is required to switch from a classic ASP website to ASP.NET website using Entity Framework for back-end, and enhance security and performance. Customers may place orders and redirects to the payment gateway for purchase.
